

# Zero carbon shipping - creating a **sustainable supply chain**

We understand the growing stakeholder demands to reduce carbon emissions. We now offer a full range of sustainability services, including carbon offsets, to support you and provide a service to your customers

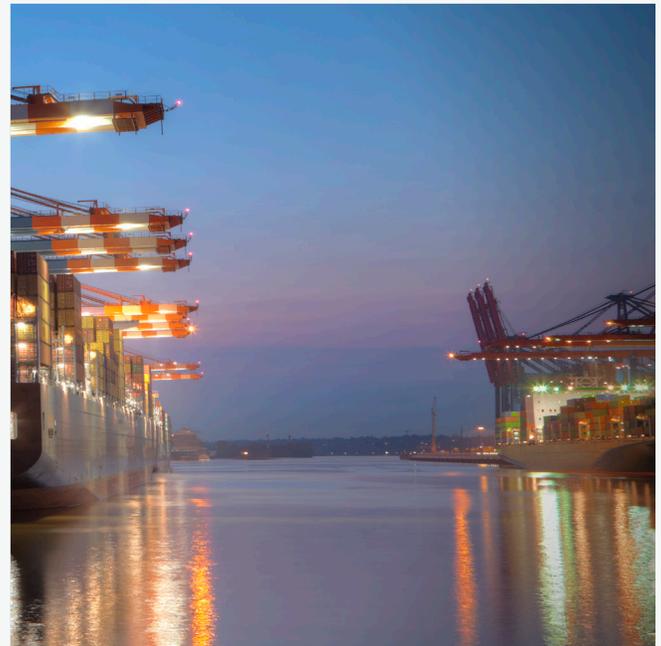

## **Our sustainable journey together - how it works**

A carbon offset shows proof of reducing your carbon emissions to you or your customers, who can apply that saving to the carbon footprint of the goods shipped. Together with our expert partner World Kinect Energy Services, we make sizing and executing high quality certified offsets easy.

Carbon reduction enhances your brand, or those of your customers, in the eyes of end customers, investors and stakeholders.

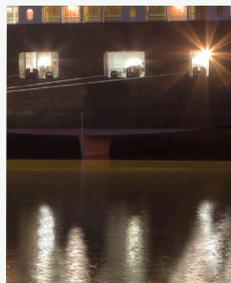

It can also prepare you for growing regulations in some of the markets we ship to on your behalf. Shipping freight is also a significant part of the carbon footprint of all the goods transported. World Kinect Energy Services can provide the means to legitimately and verifiably offset those carbon emissions. We support 85,000 customers world-wide with a full range of other related services too.

We can source offsets for the full amount of carbon dioxide emissions you wish to reduce, typically priced in \$ per tonne. In the Marine industry, 1 metric tonne of Marine fuel equals approximately 3 tons of CO<sub>2</sub> equivalent emissions.

## **Why offset?**

Investment in offsetting is an immediate action that you or your customers can take to reduce emissions now, with a clear demonstration of positive impact to all your stakeholders.

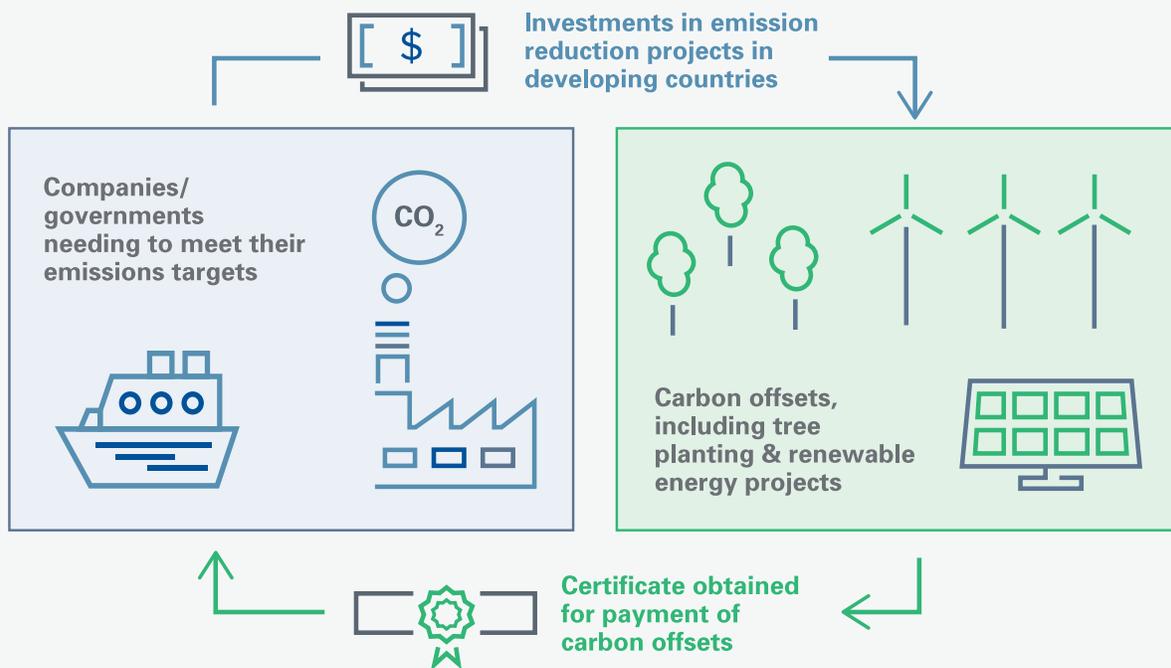

## **A simple worry-free solution**

- Different project types, like wind, solar and reforestation
- Asset vintage
- Geography
- Certificates to cover emissions at single or multiple sites, journeys or vessels
- Environmental and social impact

We provide Certified Emission Reductions (CER), Verified Emission Reductions (VER) and an optional Gold Standard with full documentation recognized by the United Nations. On your behalf, we can customize sourcing solutions for you or your customers, support you with an end-to-end service backed by accredited projects, trading, delivery and cancellation of certificates after use, saving you time and money.

## Here's how it works

## Get Started Today!

With World Kinect Energy Services, you can operate a zero-carbon shipping solution in 2020.
